I. CALL TO ORDER FOR MAY 1, 2013

The meeting of the Continuing Education Advisory Committee was called to order at 12:01 p.m. on Wednesday, May 1, 2013. The meeting was held by electronic means in compliance with Iowa Code section 21.8. The purpose of the meeting was to review minutes from prior meetings, review requests for continuing education courses and sponsor approval, and other Committee-related matters. It was impossible for the Committee to schedule a meeting in person on such short notice and impractical to meet with such a short agenda. A quorum was established with five (5) members present.

Roll Call:

<u>Member</u>	<u>Beasler</u>	<u>Cacioppo</u>	<u>Curry</u>	<u>Elmitt</u>	<u>Malmberg</u>	<u>North</u>	<u>J. Slach</u>
Present	x	x	x	x		x	
Absent					x		x

II. APPROVAL OF MINUTES

- *January 4, 2013 – Teleconference*
- *March 12, 2013 – Teleconference*

❖ MOVED by CURRY, SECONDED by NORTH, to APPROVE the minutes as submitted. Motion APPROVED unanimously.

III. CONTINUING EDUCATION COURSE APPLICATIONS

- *Periodontal Specialists: “Accurate Record Keeping: Enhancing Practice Care” (1.5 hours)*

❖ MOVED by CACIOPPO, SECONDED by ELMITT, to APPROVE the course as submitted. Motion APPROVED unanimously.

- *Periodontal Specialists: “Infection Control Systems/Requirements: Protecting Our Patients and Team” (1.5 hours)*

❖ MOVED by CACIOPPO, SECONDED by ELMITT, to APPROVE the course as submitted. Motion APPROVED unanimously.

- *Periodontal Specialists: “Impact of Alternative Medicine on Clinical Dentistry: Complementary or Conflicting” (3 hours)*

❖ MOVED by CACIOPPO, SECONDED by ELMITT, to APPROVE the course as submitted. Motion APPROVED unanimously.

- *Black Hawk County I-Smile Program: “Dentist by One... Make the First Visit Fun” (3 hours)*

❖ MOVED by CACIOPPO, SECONDED by ELMITT, to APPROVE the course as submitted. Motion APPROVED unanimously.

- *Iowa Academy of Pediatric Dentistry: “Advancements in Pediatric Dentistry 2013” (7 hours)*

❖ MOVED by CACIOPPO, SECONDED by NORTH, to APPROVE the course as submitted. Motion APPROVED unanimously.

- *Metro West Dental – Dr. Takanari Miyamoto: “Annual Anatomy Review” (2 hours)*

❖ MOVED by CACIOPPO, SECONDED by ELMITT, to APPROVE the course as submitted. Motion APPROVED unanimously.

- *North Iowa Dental Seminars: “Some Days You’re the Pigeon... Some Days You’re the Statue” (6 hours)*

Ms. Braness reported that this course was not reviewed previously based on a search of the list of courses reviewed by the Continuing Education Advisory Committee. Ms. Cacioppo believed that this course had been reviewed previously.

Ms. Beasler, Ms. Cacioppo, Ms. Elmitt expressed their opinions that this course focused too much on practice management and non-patient communication. Dr. Curry agreed with those prior comments.

❖ **MOVED** by NORTH, **SECONDED** by BEASLER, to **DENY** the course as submitted. Motion **APPROVED** unanimously.

- *North Iowa Dental Seminars: “Oral Pathology” (3 hours)*

❖ **MOVED** by CACIOPPO, **SECONDED** by NORTH, to **APPROVE** the course as submitted. Motion **APPROVED** unanimously.

- *North Iowa Dental Seminars: “Head & Neck Radiation Therapy & the Effects on Your Patients” (3 hours)*

❖ **MOVED** by CACIOPPO, **SECONDED** by ELMITT, to **APPROVE** the course as submitted. Motion **APPROVED** unanimously.

- *North Iowa Dental Seminars: “Fusion Series” (6 hours)*

Ms. Cacioppo stated that this course focuses on business and marketing. This course is not clinically-focused enough to warrant continuing education credit. Ms. Beasler agreed.

❖ **MOVED** by BEASLER, **SECONDED** by NORTH, to **APPROVE** the course as submitted. Motion **APPROVED** unanimously.

- *CNA: “Dental Professional Liability Risk Management Seminar” (4.5 hours)*

Ms. Cacioppo recommended approval based on the focus of risk management. Ms. Elmitt and Ms. Beasler agreed.

❖ **MOVED** by CACIOPPO, **SECONDED** by CURRY, to **APPROVE** the course as submitted. Motion **APPROVED** unanimously.

IV. CONTINUING EDUCATION COURSE APPLICATIONS – RECONSIDERATIONS

- *Iowa Dental Association: “Dental Equipment Maintenance Training” (3 hours)*

Ms. Cacioppo reported that licensees requested reconsideration of this course. Ms. Cacioppo stated that she is not opposed to the course, in general; however, she does not see how it fits into current guidelines for credit as established by rule. Ms. Beasler and Dr. North agreed. The committee determined that the course is not relevant to clinical practice.

- ❖ **MOVED** by NORTH, **SECONDED** by CURRY to **DENY** credit for this course as requested. Motion **APPROVED**.

- *Iowa Dental Association: “Posture, Pain and Productivity in Dentistry” (2 sessions) (2 hours, 1.5 hours)*

Ms. Cacioppo reported that in reviewing the rules and regulations for continuing education, she believed that these courses should not be approved for credit unless there is an application to treating the patient. Dr. North agreed with Ms. Cacioppo’s interpretation of the rules.

Ms. Beasler stated that the course is probably a good one; however, it does not appear to have an application to the patient.

Dr. Curry reported that he received multiple comments from licensees concerning this course. Dr. Curry stated that ergonomics affect the patient in that if the practitioner’s posture or pain can have an impact on the care provided.

Ms. Cacioppo indicated that she understood that; however, in those cases, it is up to the practitioner to seek out help and care to correct any physical issues. Ms. Beasler agreed since a practitioner should stay home if they cannot provide sufficient care.

- ❖ **MOVED** by NORTH, **SECONDED** by BEASLER, to **DENY** the course as submitted. Motion **APPROVED** unanimously.

- *Eastern Iowa Community College: “Healthy Hands/Ergonomics” (Renamed: “Posture and Ergonomics for the Dental Professional”) (2 hours)*

Ms. Cacioppo stated that it did not appear that the course content had changed. Therefore, the prior decision should stand.

- ❖ **MOVED** by CACIOPPO, **SECONDED** by NORTH, to **DENY** the course as determined previously. Motion **APPROVED** unanimously.

V. CONTINUING EDUCATION SPONSOR APPLICATIONS

- *Compliance Training Partners/HPTC, LLP (Reconsideration Request)*

Ms. Cacioppo reported that this is a request for reconsideration. Based on the new information submitted, Ms. Cacioppo indicated that the application should be approved.

- ❖ MOVED by CACIOPPO, SECONDED by CURRY, to APPROVE the sponsor application. Motion APPROVED unanimously.

VI. OTHER BUSINESS

- *Partial Residency Program – Continuing Education Hours*

Ms. Cacioppo asked about this request. Ms. Braness indicated that a licensee started a residency program; however, he left prior to completing the program. Ms. Braness summarized the rule addressing the question of continuing education credit for post-graduate study of health sciences.

Dr. North asked for more information about the portion of the semester that was related to clinical practice and training. Ms. Braness reported that licensee indicated that the program was not broken up into semesters.

- ❖ MOVED by NORTH, SECONDED by CURRY, to APPROVE 8 hours of credit submitted.

Ms. Cacioppo asked Dr. Curry about possible clarification on the Indian Health Services program and how this might compare to other residencies.

Ms. Beasler stated that if this program is similar to the general practice residency at University of Iowa College of Dentistry, there would be training involved.

Dr. North withdrew the motion following the subsequent discussion.

- ❖ MOVED by NORTH, SECONDED by CURRY to request additional information. Motion APPROVED unanimously.

- *Committee appointments for May 2013 Board Meeting*

Ms. Braness reminded the committee members that the Board would make committee appointments at the May 2013 meeting of the Board. Any members who did not have the time to devote to the committee had the opportunity to decline reappointment. Ms. Braness stated that the assumption would be that the committee members were open to reappointment unless they indicated otherwise.

VII. OPPORTUNITY FOR PUBLIC COMMENT

VIII. ADJOURN

- ❖ MOVED by NORTH, SECONDED by ELMITT, to adjourn. Motion APPROVED unanimously.

The meeting of the Continuing Education Advisory Committee adjourned the meeting at 12:29 p.m.

I. CALL TO ORDER FOR JULY 24, 2013

The meeting of the Continuing Education Advisory Committee was called to order at 12:01 p.m. on Wednesday, July 24, 2013. The meeting was held by electronic means in compliance with Iowa Code section 21.8. The purpose of the meeting was to review minutes from prior meetings, review requests for continuing education courses and sponsor approval, and other Committee-related matters. It was impossible for the Committee to schedule a meeting in person on such short notice and impractical to meet with such a short agenda. A quorum was established with five (5) members present.

Roll Call:

<u>Member</u>	<u>Beasler</u>	<u>Cacioppo</u>	<u>Elmitt</u>	<u>Fuller</u>	<u>Malmberg</u>	<u>North</u>	<u>J. Slach</u>
Present	x	x	x		x	x	
Absent				x			x

II. REVIEW OF COMMITTEE RESPONSIBILITIES

Ms. Elmitt indicated that this information was provided due to the appointment of a new Committee member. It provided an overview of the roles and responsibilities of the Committee.

III. APPROVAL OF MINUTES

- *May 1, 2013 – Teleconference*

Ms. Braness reported that the minutes for the May 1, 2013 teleconference were not distributed for review as anticipated. The minutes from that meeting will be forwarded for review at the next meeting.

IV. CONTINUING EDUCATION COURSE APPLICATIONS

- **G.V. Black Dental Study Club:** “Dental Sleep Medicine” (3 hours)
- **G.V. Black Dental Study Club:** “Temporomandibular Disorders (Diagnosis and Treatment), Radiology (Pathosis and Treatment)” (6 hours)
- **G.V. Black Dental Study Club:** “Medical Disorders/Current Treatment Protocols & Considerations of These in Dental Treatment” (6 hours)
- **G.V. Black Dental Study Club:** “Aveolar Ridge Preservation/Implant Site Development; Periodontal Regeneration/Grafting; Implant Maintenance” (6 hours)
- **G.V. Black Dental Study Club:** “Dental Materials, Caries Management, Composites, & Clinical Operative Techniques” (6 hours)

❖ MOVED by CACIOPPO, SECONDED by MALMBERG, to APPROVE the courses submitted by G. V. Black Dental Study Club as requested.

Ms. Beasler questioned the reference to medical profession for the “Dental Sleep Medicine” course because that term is vague. The committee requested that the letter to the sponsor in reference to this course indicate that the “medical professional” must be a licensed medical professional. The committee also wanted to thank the sponsor for the prompt submission of their requests.

❖ Motion APPROVED unanimously.

- **Eastern Iowa Community College:** “Infection Control & Dental Radiography” (2 hours each; 4 hours total)

❖ MOVED by CACIOPPO, SECONDED by NORTH, to APPROVE the course as requested. Motion APPROVED unanimously. Malmberg abstained.

- **Broadlawns Medical Center:** “The Refugee Experience” (2 hours)

Ms. Cacioppo indicated that the name of the course is a misleading; however, the course content meets the requirements for approval related to communication.

Ms. Beasler questioned the number of hours for credit. The sponsor has requested two (2) hours, but the course is 3.5 hours in length.

❖ MOVED by CACIOPPO, SECONDED by NORTH, to APPROVE the course for two (2) hours as requested by the sponsor. Motion APPROVED unanimously.

- ***Institute for Natural Resources: “Food, Mood, & Cognition” (6 hours)***

Ms. Cacioppo and Ms. Malmberg recommended denial of the course since it does not focus on clinical dentistry.

➤ 12:13 pm – Ms. Johnson joined the meeting

❖ MOVED by CACIOPPO, SECONDED by BEASLER, to DENY continuing education credit for this course since it does not address the practice of dentistry. Motion APPROVED unanimously.

- ***Southeast Iowa Dental Society: “Considerations for Providing Dental Treatment to the Geriatric Patient” (3.5 hours)***

❖ MOVED by CACIOPPO, SECONDED by MALMBERG, to APPROVE the course as requested. Motion APPROVED unanimously.

- ***Nebraska Society of Periodontology: “Restoratively-driven Implant Failure – What Every Dentist, Hygienist, Assistant and Lab Technician Needs to Know” (7 hours)***

Ms. Cacioppo questioned the total number of hours requested when looking at the flyer. Ms. Davidson and Ms. Braness confirmed that the hours were listed. Ms. Braness reported that the course submission was provided on colored paper, which can make scanning the document difficult.

❖ MOVED by CACIOPPO, SECONDED by NORTH, to APPROVE the course as requested. Motion APPROVED unanimously.

- ***Kirkwood Community College: “Mental Health First Aid (12 hours)***

Ms. Cacioppo stated that she was inclined to deny continuing education credit for this course; and asked if Ms. Malmberg knew anything about it since she works at this college. Ms. Malmberg does not have any information and reported that she was also inclined to deny credit.

❖ MOVED by CACIOPPO, SECONDED by NORTH, to DENY the course as requested. Motion APPROVED unanimously.

- ***Oral Surgery Associates of Iowa City: “State of the Art Topics & Techniques in Implant Prosthetics for Private Practice” (6 hours)***

Ms. Cacioppo questioned how many of the six (6) hours focused on business. In reviewing the information, the course appears to meet criteria for credit.

- ❖ MOVED by CACIOPPO, SECONDED by NORTH, to APPROVE the course as requested. Motion APPROVED unanimously.
 - ***Gunderson Health Systems: “Radiation Safety & Quality Control for Dental Professionals” (2 hours)***

Ms. Beasler asked for information. Ms. Cacioppo recommended approval.

- ❖ MOVED by CACIOPPO, SECONDED by MALMBERG, to APPROVE the course as requested. Motion APPROVED unanimously.
 - ***Omni Dental: “TMD Workshop: Team Approach to TMD” (15 hours – assuming 1 hour for lunch each day)***

Ms. Cacioppo stated that she liked that the breakdown of hours was provided; however, she questioned some of the content. Ms. Cacioppo would have liked more information prior to making a final recommendation.

Dr. North agreed that it is hard to tell just looking at the information provided what may be relevant to the practice of dentistry.

- ❖ MOVED by CACIOPPO, SECONDED by MALMBERG, to request additional information prior to making a final recommendation. Motion APPROVED unanimously.
 - ***Darcey Siemering, R.D.H.: “Learn to Ease and Manage ‘Cumulative Trauma Disorder” – Therapeutic Workshop for Dental Assistants and Hygienists” (2 hours)***

Ms. Cacioppo recommended denial due to a lack of focus on the practice of dentistry.

- ❖ MOVED by BEASLER, SECONDED by CACIOPPO, to DENY the course as requested. Motion APPROVED unanimously.
 - ***Institute for Natural Resources: “Understanding Dementia” (6.75 hours – assuming 1 hour for lunch)***

Ms. Cacioppo recommended denial of the course since it is not related to the practice of dentistry.

- ❖ MOVED by CACIOPPO, SECONDED by NORTH, to DENY the course as requested. Motion APPROVED unanimously.

V. CONTINUING EDUCATION SPONSOR APPLICATIONS

- *Laboratory Consultation Services*

Ms. Cacioppo stated that most of the courses did not meet criteria for credit. Ms. Cacioppo recommended that the Committee deny the application for sponsor status, but offer to review individual courses.

- ❖ MOVED by CACIOPPO, SECONDED by NORTH, to DENY the sponsor application, but offer to review individual courses for credit. Motion APPROVED unanimously.

VI. OTHER BUSINESS

- *Partial Residency Program – Continuing Education Hours*

Ms. Braness provided an overview of the request.

Ms. Cacioppo stated that she sees two ways to handle this request.

1. Grant 15 hours of credit for the period completed, or
2. Reference the continuing education exemption for practitioners who are active duty in the military.

Ms. Braness recommended that the Committee make a decision based on Board rule Iowa Administrative Code 650--25.3(4) “b”, which allows 15 hours of credit per semester for the “*postgraduate study relating to health sciences.*”

- ❖ MOVED by CACIOPPO, SECONDED by NORTH, to grant 15 hours of credit for each period of time, which would be equivalent to a semester. The licensee should provide confirmation of enrollment with residency program, along with the dates of enrollment. The committee also asked that he provide a written response addressing the reason why he left the program. The letter to the applicant should also make a reference to the active-duty-military exemption. - Motion APPROVED unanimously.

- *Discussion RE: Iowa Dental Association: “Posture, Pain, and Productivity in Dentistry”*

Ms. Braness provided an overview of the request including a summary of the requests for reconsideration.

Ms. Cacioppo asked Dr. North if he attended the course in question. Dr. North indicated that he did not. Ms. Cacioppo reported that she reviewed the information provided again and would continue to recommend denial since there is no clear provision in the rules to grant credit for courses of this nature.

- ❖ MOVED by CACIOPPO, SECONDED by NORTH, to DENY the course, as previously recommended. Motion APPROVED unanimously.

Roll Call:

<u>Member</u>	<u>Beasler</u>	<u>Cacioppo</u>	<u>Elmitt</u>	<u>Fuller</u>	<u>Malmberg</u>	<u>North</u>	<u>J. Slach</u>
Yes	x	x	x		x	x	
No							
Absent				x			x

VII. OPPORTUNITY FOR PUBLIC COMMENT

Ms. Beasler asked about the Mercy Hospital – Cedar Rapids – cancer courses. The cancer center will be offering a course, which will address cancer of the head and neck. The course discussion is intended to focus on eating, swallowing, and the impact related to cancer treatments.

Ms. Braness recommended that the course information be submitted for review. Ms. Elmitt and Ms. Cacioppo agreed.

VIII. ADJOURN

❖ MOVED by NORTH, SECONDED by CACIOPPO, to adjourn. Motion APPROVED unanimously.

The meeting of the Continuing Education Advisory Committee adjourned the meeting at 12:48 p.m.

NEXT MEETING OF THE COMMITTEE

The next meeting of the Continuing Education Advisory Committee is scheduled for September 10, 2013. The meeting will be held at the Board offices and by teleconference.

These minutes are respectfully submitted by Christel Braness, Program Planner 2, Iowa Dental Board.

TITLE: An Overview of Pediatric Dentistry

Alex J. Brandtner D.D.S., M.S.

Karen A. Wadsworth R.D.H.

Curriculum and Vetac:

Dr. Alex J. Brandtner did his undergraduate work at William Penn University from 1973-1977. He then attended dental school at the University of Iowa from 1977-1981. After completing dental school he did a residency program in Pediatric Dentistry at the University of Iowa Hospital and Clinics from 1981-1983. Dr. Brandtner then completed his masters in Pediatric Dentistry in 1989. He is a Fellow of the American College of Dentists and Pierre Fauschard 2000.

Karen A. Wadsworth attended Kirkwood Community college where she completed her Associates of Applied Science degree, while enrolled in the Dental Assisting Program in 2007. She continued her education at Saint Ambrose University, completing her Bachelors of Science degree in Biology in 2010. Karen then completed a 2 year degree in Dental Hygiene and became a Registered Dental Hygienist in 2012.

Description of the Course:

This presentation will teach the dental professional about pediatric dentistry. Pediatric dentistry specializes in teaching children and parents about the risks and benefits of good oral hygiene. Among the topics of discussion this evening are teaching children the importance of a healthy mouth while controlling their behavior. The presentation will cover the patient's first dental visit to the office, office protocol and procedures. Pediatric dentistry covers a broad spectrum of topics many of which we will touch upon tonight.

Outline:

- Hygiene & Prevention of Caries in a Pediatric Setting
- Community Outreach & Education
- Office Protocol & Procedures
 - Initial Visits
 - Behavioral Management
- Treatment Planning & Clinical Procedures
 - In Office
 - Hospital Sedation

Conclusion:

The dental professional will have learned how to interact with children in the dental office, behavioral control expectations, pediatric operative procedures, and a general overview of how a pediatric office operates on a daily basis. Pediatric dentistry is a complex mixture of patient compliance and

Board rules specify that the following subjects are NOT acceptable for continuing education credit: personal development, business aspects of practice, personnel management, government regulations, insurance, collective bargaining, and community service presentations.

If the course was offered by a Board approved sponsor, you should contact the sponsor directly for approval information, rather than submitting this form. A list of approved sponsors and contact information is available on the Board website at www.dentalboard.iowa.gov. Continuing education guidelines and rules are also available on the Board's website. A course is generally acceptable and does not need to go through this formal approval process if it is directly related to clinical practice/oral health care.

Pursuant to Iowa Administrative Code 650—25.3(5), please submit the application for approval 90 days in advance of the commencement of the activity. The Board shall issue a final decision as to whether the activity is approved for credit and the number of hours allowed. The Board may be unable to issue a final decision in less than 90 days. Please keep this in mind as you submit courses for prior approval.

2013 Fall Cancer Care Update for Dental Health Professionals
Wednesday evening, September 25, 2013 or Friday mid-day, October 25, 2013
Hallagan Education Center • Mercy Medical Center • 701 10th Street SE •
Cedar Rapids, IA

9/25/13	Program Agenda	10/25/13
5:30 pm	Registration & Light Meal	11:30 am
6:10 pm	Welcome/Introductions	12:10 pm
6:15 pm	<i>Who is Still Using Tobacco and How is it Harming Them?</i> <i>Nancy A. Slach, RDH, BS, TTS</i>	12:15 pm
7:15 pm	Break/Desserts	1:15 pm
7:30 pm	Keeping Dental Health Professionals Informed: The Basics of Tobacco Cessation and the Latest Information on Tobacco Products <i>Nancy A. Slach, RDH, BS, TTS</i>	1:30 pm
8:30 pm	Evaluation & Adjournment	2:30 pm

Intended Audience

Dentists, dental hygienists, dental assistants and other dental professionals.

Purpose and Objectives

Dental Health Professionals are an integral part of the team involved in the care of cancer patients. The purpose of this program is to offer dental health professionals the opportunity to learn about current issues involved in the care of patients who have a diagnosis of cancer.

Upon completion of this program, participants will be able to:

- Explain to dental patients how tobacco use harms the body
- Describe up to date information about tobacco cessation and new tobacco products on the market

Faculty

Nancy A. Slach, RDH, BS, TTS
 Assistant in Instruction
 Department of Periodontics
 University of Iowa College of Dentistry
 Iowa City, Iowa

Nancy A. Slach, Assistant in Instruction

Department of Periodontics, University of Iowa College of Dentistry

Education: RDH, BS, University of Michigan, 1980

Brief Professional Resume:

Prior to joining the faculty at the College of Dentistry in the fall of 1985, Ms. Slach had experience in private practice and public health dental hygiene, as well as practicing at The University of Iowa in Hospital Dentistry. She is a dental hygienist with a bachelor of science degree in dental hygiene from the University of Michigan. She attended the University of Iowa where she worked on a masters in public health dentistry and received her tobacco treatment specialist certification from the Mayo Clinic. She has been employed by the University for over 30 years and has held positions in both the University of Iowa Hospital Dental Clinic as well as her current teaching position at the College of Dentistry. She has practiced dental hygiene in private practice as well as in public health dental hygiene in Iowa County's Well Child Clinic. She also volunteers at the Free Dental Clinic in Iowa City and has volunteered at Iowa Mission of Mercy events, which provide dental care to thousands of Iowans. Currently, she is employed as an assistant in instruction in the Department of Periodontics and as the director of the Tobacco Cessation Program for the College of Dentistry, one of the first to be established in a dental school, which she started in 1992. Her passion continues to be helping patients stop using tobacco. She is involved at the local and state levels in tobacco cessation and tobacco control activities and she is a member of the Association for the Treatment of Tobacco Use and Dependence (ATTUD). Ms. Slach has presented numerous programs to dental health professionals over the past two decades. In May 2012, she was appointed by Governor Branstad to serve on the Iowa Dental Board.

National or International Professional Appointments and Activities:Ms. Slach is a member of the American Dental Hygienists Association, the American Association of Public Health Dentistry, and the American Dental Education Association (ADEA). She is a past president of the Iowa Dental Hygienists Association and has served the association in various other offices. She is also a member of ADEA's National Tobacco Free Steering Committee.

Dear Sir or Madam:

This is a request of the Iowa Dental Board to approve 2 hours of continuing education credits for dentists, dental assistants, and dental hygienists for this upcoming educational program: 2013 Fall Cancer Care Update for Dental Health Professionals. Enclosed is the conference agenda, bio information on Nancy A. Slach and the \$10.00 application fee. The program is scheduled for September 25, 2013 and will be repeated on October 25, 2013. These identical programs will both be held at Mercy Medical Center in Cedar Rapids, IA. , and I am asking permission to offer continuing education approval for both dates.

The purpose of this program is to offer dental health professionals the opportunity to learn about current issues involved in the care of patients who have a diagnosis of cancer.

I would appreciate your consideration for approval of this continuing dental education application. If you need additional information or have questions, please call me at (319) 221-8771.

Sincerely,

Celeste Barkley, RN, OCN

About the Speaker

Dr. Robert Vogel graduated from the Columbia University School of Dental and Oral Surgery in New York City, New York, upon graduation, he completed a combined residency program in Miami, Florida at Jackson Memorial Hospital, Mount Sinai Medical Center, and Miami Children's Hospital. He maintains a full-time private practice in implant, prosthetics and reconstructive dentistry, located in Palm Beach Gardens, FL. He works closely as a team member with several specialists providing implant-based comprehensive treatment, as well as conducting clinical trials and providing clinical advice to the dental attachment and implant fields. Dr. Vogel has developed and collaborated on the development of several prosthetic components and techniques currently in use in implant dentistry. He lectures internationally on implant dentistry, focusing on simplification, confidence, and predictability of implant prosthetics through ideal treatment planning and team interaction. Dr. Vogel continues to publish scientific articles on implant dentistry, and is a Fellow of the International Team for Implantology (ITI).

State of the Art Implant Dentistry

Presented by Dr. Robert C. Vogel

Join us for an evening dinner and discussion with Robert C. Vogel, DDS.

It will be an exceptional opportunity for dentists with various levels of implant experience to learn and interact with a recognized leader in implant dentistry.

Topics:

- Predictable Treatment Planning
- Provisionalization and Soft Tissue Esthetics
- Simplified Overdentures
- Implant Retained Partial Dentures
- Fee Determination
- Benefits of CAD/CAM

Date: Thursday November 14, 2013

RE: Bloodborne Pathogen and Hazard Communication Training- 3 hours CEU
Safe Patient Handling in a Dental Office- 2 hours CEU

To Whom It May Concern:

The purpose of this correspondence is to request approval of 5 hours of continued education for courses that Compliance Solutions Inc. presented to our staff on July 16, 2013. Our office hired Compliance Solutions Inc, Silver Creek Township, MN to provide our staff with the proper training in Safe Patient Handling and OSHA training which included the mandatory training on Safety Data Sheets. Their name was provided to us by the Minnesota Department of Health as we were looking for a company that could educate our staff on the MN Dental Boards requirement for safe patient handling training. Compliance Solutions Inc. issued our staff CEU certificates for attending these classes. However, Leanne Kramer informed us today that they did not request hours from the Iowa Dental Board; and that we needed to get approval for Iowa credit hours since our company was the Sponsor.

I have enclosed the required information along with a check for \$10.00. I appreciate your consideration.

Sincerely,

John B. Synhorst, II, DDS

Tuesday July 16, 2013

10am – 1pm Bloodborne Pathogen and Hazard Communication Training

Information and training session on preventing occupational exposure to bloodborne pathogens, post exposure program, hazard communications, employee right to know program and the new GHS chemical classification labeling system

1:15 – 3:15pm Safe Patient Handling in a Dental Office

An explanation - legislation passed law / OSHA implements and enforces ADA and discrimination

Safe Patient Handling plan needed for office

Discussion of assessment risks

Explanation of the types of equipment, transfers and body mechanics

Hands on training on how to properly assist/transfer patient safely

*Both trainings used power point and handouts

*Both trainings are designed specifically for all dental clinical staff

Leanne M. Mathieu Kramer is a Licensed Dental Assistant, Certified Dental Assistant, and Certified Dental Practice Management Administrator through the Dental Assistant National Board with 25 years experience in dentistry. Leanne is authorized by the Department of Labor as an OSHA Outreach Trainer in General Industry. Her memberships include, The Organization for Safety and Asepsis Procedures, American Dental Assistants Association, Association for Professionals in Infection Control and Epidemiology, and Northern Dental Alliance.

After working in the clinical setting Leanne saw a common need among the offices. With so much focus on quality patient care, new products and technology keeping up with written infection control, MSDS, and radiation manuals fall to the back burner.

This inspired the creation of Statements Plus Compliance Solutions Inc.

In 2012 we added an additional OSHA trainer (Susan Halek, LDA) and a LPTA (Colleen Vivant) to lead Safe Patient Handling hands-on training to dental offices.

EMPLOYEE TRAINING RECORD

On the date indicated below, our office conducted an information and training session for the staff members on the subject of Preventing Occupational Exposure to Bloodborne Pathogens, Hazardous Waste, Hazard Communications/GHS, Employee Right-to-Know and Radiation rules/Xray Protocol.

Date of training session: Tuesday, July 16, 2013

Training conducted by: Susan Halek, Compliance Solutions, Inc.

Qualifications of trainer: LDA, OSAP member

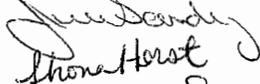

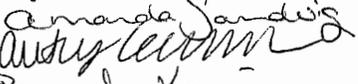

Format: Initial Scheduled review New information Remedial

Contents of training session:

- An explanation of the Bloodborne Pathogens Standard and how it relates to dentistry
- An explanation of the epidemiology and symptoms of bloodborne diseases like HBV and HIV
- An explanation of the modes of transmission of bloodborne pathogens like HBV and HIV
- An explanation of bloodborne diseases other than HBV and HIV, like hepatitis C and Syphilis
- An explanation of the exposure control plan, its location and how employees can obtain a copy
- An explanation of methods for recognizing tasks that may involve exposure to blood or saliva
- An explanation of the basis for selection of personal protective equipment (PPE)
- Information on types, use, location, removal, handling, decontamination, and disposal of PPE
- Information on the hepatitis B vaccine
- Information on the appropriate action to take in an emergency involving blood or saliva
- An explanation of the procedures to follow if an exposure incident occurs
- Information on the post-exposure evaluation and follow-up provided by the employer
- An explanation of the biohazard labels and/or color-coding used in the office

- OSHA Hazard Communication Standard / OSHA Employee Right-to-Know Program
- An explanation of the general policy
- An explanation the plans location and how employees can obtain a copy
- An explanation of the safety data sheets location and how to read
- An explanation on what must be on a secondary containers label
- Information in the appropriate PPE when handling hazardous chemicals
- Explanation of nonroutine tasks and emergency notifications
- Explanation of the GHS System including pictogram, signal word, hazard and precautionary statements

- Complying with MN Dept of Health Ionizing Radiation rules

MEET THE SPEAKERS

Dr. Reuel D. Owen, DDS graduated from Indiana University and the University of Illinois. He has maintained a general dentistry practice in Galesburg since 1977. He is a member of the American Dental Association, the Prairie Valley Dental Society, International Association for Orthodontics as a Diplomat and a certified senior instructor, and a Fellow of the Academy of General Dentistry. Dr. Owen is a member and instructor of the QCASO Study Group. He regularly attends and instructs continuing education classes in general dentistry and orthodontics.

Vicki Rose is currently employed as the Director of Substance Abuse Services at Bridgeway Inc, a non-profit, outpatient Community Mental Health Center in Western Illinois and Eastern Iowa. She has been employed there since April 2004. Vicki is a certified alcohol and drug counselor through the Illinois Alcohol and Other Drug Abuse Professional Certification Association. She also holds a board registration of MISA I, through the Illinois Certification Board, which denotes a specialty in the co-occurring disordered population. Vicki also specializes in DUI evaluations for court ordered DUI offenders, as well as evaluations for the Illinois Secretary of State License re-instatement process. Vicki has a Bachelors of Science degree from Truman State University, majoring in Justice Systems and minoring in Psychology. She has experience working for the Virginia Department of Corrections within a Therapeutic Community model, as well as working in a detoxification program. She was involved with the development of the Knox County Drug Court and continues in the day to day management of that program. Vicki is also on the Board of Directors of the Knox County Substance Abuse Prevention Coalition.

Trooper Jason Wilson, Illinois State Police, District 7, Safety Education Office has been with the Illinois State Police since 2000. He is in his 14th year as a trooper. Jason served 4 years in Chicago on the toll roads and was transferred to the Quad Cities area in 2004. He has been a First Responder Instructor since 2006. Trooper Wilson has been awarded three life-saving awards. Also, he is a member of the Region II Crowd Control Team and has been assigned to NATO protests, biker rallies, anti-war protests, and NIU Homecoming to name a few. He has been with the Safety Education Unit since 2007. Jason still remains active on patrol and when time allows, participates in traffic, DUI and drug interdiction enforcement.

Vickie Lewis, BA, CRADC, MISA I, PCGC is currently the Addiction Representative for Dominion Diagnostics and is proud to work for a company who is focused on understanding the needs of patients and healthcare providers. Vickie was the Corporate Services Clinician at the Illinois Institute for Addiction Recovery at Proctor Hospital in Peoria, Illinois for over 7 years and before that was employed with Children's Home working in residential care and juvenile justice programs. She has worked in various areas of treatment for adults and young adults. She has been instrumental in the training of staff upon the opening of new treatment sites including Ingalls Hospital in Harvey Illinois and The Abbey in Bettendorf, Iowa. She has participated as a trainer for the Gambling Counselor certification training and also conducts presentations to health care providers, schools, and residents in the community on topics relating to addiction and mental health.

Vickie graduated from Spoon River College with an Associates of Arts degree in Early Childhood Education then pursued her Bachelor of Arts degree in Criminal Justice at Sangamon State University with graduate studies in Child, family and Community Services from the University of Illinois at Springfield. She is a Certified Reciprocal Alcohol and other Drug Counselor as well as a Compulsive Gambling Counselor and is credentialed as a provider to dually diagnosed clients (MISA I). Vickie has authored articles that have been published in national and local magazines and publications. She has been interviewed by many television, newspaper and radio stations and is a past Board of Directors member for NAMI and served as recording secretary.

Sandra Beecher, BA, MA, CRADC, MISA I, PCGC, SAP is currently the Corporate Services Clinician at the Illinois Institute for Addiction Recovery at Advocate BroMenn Medical Center in Normal, Illinois. She graduated from Lincoln Christian University (LCU) with a Bachelor of Arts degree in Church and Family Life Pre-Counseling. She has just recently graduated May 2013 with her Master of Arts in Counseling at LCU. She is a Certified Alcohol and other Drug Counselor, Substance Abuse Professional (SAP), as well as a Compulsive Gambling Counselor, and is credentialed as a professional provider to clients with dual diagnoses of mental illness and substance abuse (MISA I).

Sandra has been with the Illinois Institute for Addiction Recovery since 2008. She has been treating adults and adolescents in multiple arenas for the past 13 years. In addition, Sandra has worked with the Professional Foster Care Association for the past 24 years with Children's Home and Aid Society and fostered over 56 children. She has been married for 13 years, has 10 adopted and 3 step-children. She has conducted many educational presentations for health care providers, private practice clinicians, schools, and residents in the community on topics relating to addiction and mental health. Her passion is to help pave the way for those who are suffering with addictions.

Board rules specify that the following subjects are NOT acceptable for continuing education credit: personal development, business aspects of practice, personnel management, government regulations, insurance, collective bargaining, and community service presentations.

If the course was offered by a Board approved sponsor, you should contact the sponsor directly for approval information, rather than submitting this form. A list of approved sponsors and contact information is available on the Board website at www.dentalboard.iowa.gov. Continuing education guidelines and rules are also available on the Board's website. A course is generally acceptable and does not need to go through this formal approval process if it is directly related to clinical practice/oral health care.

You will be contacted after the Continuing Education Advisory Committee has reviewed your request. Please allow a minimum of two to three weeks for a response.

METRO WEST DENTAL SEMINARS PRESENTS:

“Periodontal Accelerated Osteogenic Orthodontics with Piezocision™”

Key Note Speaker: Serge Dibart, DMD

Boston, MA, USA

Dr. Serge Dibart is professor and chair of the Department of Periodontology and Oral Biology at the Boston University Henry M. Goldman School of Dental Medicine. He has developed Piezocision™ and worked on accelerated orthodontic tooth movement for the past six years. He has written numerous scientific articles in peer reviewed journals and is the author of four books. He lectures nationally and internationally and maintains a private practice limited to periodontics and implant dentistry in Boston, Massachusetts.

Course Description:

One of the challenges facing orthodontists is the need to move teeth in areas presenting with little gingiva or bone. The possibility of creating or aggravating an existing Mucogingival defect is always present when dealing with a thin biotype. Another concern, from the patient's perspective, is the time spent wearing brackets. Over the years, several surgical techniques have been developed to address these issues and reduce overall treatment time. Piezocision™ is a minimally invasive surgical procedure, combining micro incisions and localized piezoelectric decortication aimed at achieving rapid orthodontic tooth movement, with minimal trauma and patients discomfort, while strengthening the existing periodontium. The possibility of hard and/or soft tissue grafting via tunneling during piezocision™ prevents or treats Mucogingival defects and allows for successful esthetic and functional outcomes.

Learning Objectives:

- Examine the biological basis and indications of Piezocision™
- Communicate effectively with the orthodontist for successful treatment outcomes

Date: Friday October 11th

Time & Location: 9:00am to 12:00pm Live Surgery **LIMITED ATTENDANCE COST \$499**

Betsy Reynolds RDH, MS

Armed with degrees in the dental hygiene and oral biology, Betsy presents scientifically-based dental and dental hygiene continuing education programs nationally and internationally. Avidly committed to making the dental sciences understandable and relevant, Betsy devotes time and energy to publishing articles and book chapters designed to enlighten and inspire clinicians. Her continuing education presentations include a variety of topics involving the biologic basis for oral and systemic disease prevention, microbiological and immunological aspects of oral disease, implications of stress on oral and system health, oral pathological concerns, oral piercing and body modification considerations in care delivery, head and neck anatomy and scientific developments affecting oral health care delivery. Betsy lives in her home state of Idaho where she enjoys hiking, biking, gardening and taking in the breathtaking scenery with loved ones.

8. Program course description

The Stress Mess: The Impact of Stress on Oral and Systemic Health

Stress has become an integral part of everyday life. Whether rushing to an appointment across town during rush hour or dealing with difficult patient scenarios, we are often “stressed out” by the end of the day. How does stress affect our ability to make clinical decisions? How does chronic stress affect overall health? How can people better manage stressors to decrease its adverse effects on well-being? This course will help the participant answer these and many more questions through a fun, interactive program based on the latest research findings. Also included in this program will be how chronic stress impacts oral and systemic health. As a recognized risk factor for periodontal diseases, stress reduction strategies for patient care will be presented in order for the participant to devise and implement treatment plans addressing stress-related sequelae. Because stress effects can be gender specific, a portion of the course will be devoted to how men and women differ in stress management, stress responses and stress manifestations.

Following the presentation, the participant will be able to:

- Relate the physiological aspects of the stress response to systemic and oral manifestations
- Understand the effects of stress on immune system function
- Recognize how stress impacts periodontal health
- Emphasize dietary strategies designed to minimize detrimental effects of stress to dental hygiene patient
- Understand gender differences in stress responses
- Incorporate stress relieving strategies in the office and home setting

8. Program course description

The Other Vital Signs: Beyond Blood Pressure, Pulse, and Temperature

Oral and medical healthcare providers regularly check vital signs such as heart beat, breathing rate, temperature, and blood pressure to determine the health status of patients seeking their care. These signs may be watched, measured, and monitored to check an individual's level of physical functioning and to provide treatment modification strategies to render safe, effective treatment. While monitoring these vital signs is an integral component of determining health status, clinicians often overlook other components of vitality that play important roles in oral and physical fitness. This course is designed to provide clinicians with valuable information about how to identify and address patient vitality deficiencies in order to maximize oral health.

Following the course, the participant will be able to:

- Describe how sleep impacts health and disease
- Recognize the negative effects of stress on oral and systemic health
- Identify how methods of communication affect health and well-being
- Discuss the importance of water and hydration in oral health
- Summarize how vitamin D and sun exposure impacts vitality

8. Program course description

The Bitter Side of Sweets:

Understanding Today's Dietary Sweeteners and Their Impact on Oral and Systemic Health

Since saccharin made its U.S. debut at the 1893 World's Fair, Americans have been continuously introduced to a variety of artificial and naturally-derived products designed to replace sugar in their diets. From high fructose corn syrup to aspartame to sucralose to agave syrup, new sugar substitutes continue to be brought to market and added to a wide assortment of food and beverage items. Consumers and clinicians alike need to keep abreast of the benefits and potential hazards these products pose to oral and systemic health. Come prepared to learn and laugh as the latest research is presented on this 'sweet' topic.

Following the presentation, course participants will be able to:

- Compare and contrast commonly available sugar substitutes
- Understand how various sweeteners impact oral health
- Recognize how dietary sweeteners impact metabolism
- Identify naturally-derived sweeteners in food and beverage products
- Incorporate relevant information on dietary sweeteners into patient education

Title:

Factors Affecting First Dental Visit for Young Children and Subsequent Care

Presenter:

Raymond Kuthy, DDS, MPH

Goal:

Provide findings of statewide sample of young Iowa children (less than 6-years-old) who were first seen for their dental care at a community health center.

Objectives:

1. To provide information about demographic, family and medical variables that influence when a parent brings a child for their first dental visit at a community health center.
2. To discuss the clinical relevance of establishing a medical and dental home for young children
3. To discuss family and medical utilization variables that appear to influence the frequency of returning for preventive dental care subsequent to the first dental visit.
4. To provide findings from longitudinal analysis about variables that influence whether a child is more likely to develop dental caries.

Course Objectives:

To discuss the movement towards a Patient Centered Health Home and how medical and dental integration fits into that movement.

To provide ways to promote medical and dental integration within other health centers by giving examples of the medical-dental integration efforts at Erie Family Health Center.

To discuss the role of management and leadership in promoting medical and dental integration

Course Outline:

- 1) Definition of Patient Centered Health Home
- 2) Definition of medical and dental integration
- 3) Medical and dental integration efforts at Erie Family Health Center
 - a. Co-location
 - i. Same hours of operation
 - ii. Integrated front desk
 - iii. Ability to schedule medical and dental appts through call center
 - iv. Access for PBAs at Erie sites without dental to make dental appts
 - b. Coordinated staff meetings
 - i. All-Staff meetings
 - ii. Leadership team meetings
 - iii. Site management meetings
 - iv. QI meetings
 - c. Medical residents rotate through dental clinic
 - d. Pregnancy centering and parenting programs
 - e. Coordinated well-child visits
 - f. Coordinated efforts of medical and dental providers
 - g. BP and blood sugar screening for all adult dental patients
 - h. Chronic Care model of treatment
 - i. Caries risk assessment
 - ii. Self-Management goals
 - iii. Treatment protocols based on risk
 - iv. Outcome measures
 - v. Care coordination
- 4) Health center leadership's role in promoting medical and oral health integration
 - a. Servant leadership
 - b. Tools
 - c. Creating expectations
 - d. Sweet spot

Lee Francis, MD, MPH
Erie Family Health Center President and CEO

Dr. Lee Francis joined Erie Family Health Center in 1999 and has served as President and CEO since 2007. Dr. Francis is charged with enacting Erie's strategic vision of serving as a national leader in the provision of community-based health care.

Under Dr. Francis' leadership, Erie has undergone tremendous expansion, adding four new school-based sites and three primary care centers and more than doubling Erie's service capacity to close to 40,000 patients. In addition, Dr. Francis oversaw the successful implementation of electronic health record systems at all of Erie's health centers; the expansion of oral health services; and board development and diversification to assure adequate reflection of Erie's patient population. He also continues to develop and leverage partnerships with local hospitals to assure seamless services for Erie patients, and with academic institutions to implement Erie's Teaching Health Center program. Erie is one of the original 11 Teaching Health Centers in the country – and the only one in Illinois – that is part of a federal effort to transform family medicine residency programs by training physicians to practice primary care in a community-based setting.

Erie has received national and local recognition for these groundbreaking efforts, including accreditation by the Joint Commission ranking Erie's quality of care among the top 10 percent in the country; receipt of the Chicago-wide Alford-Axelson non-profit management excellence award and numerous local and national awards for its oral health, diabetes, HIV/AIDS and other innovative programs.

In addition to his executive responsibilities, Dr. Francis is a board-certified internist and cares for adult patients at Erie. He also is an Assistant Professor of Clinical Medicine at Northwestern University Feinberg School of Medicine.

Dr. Francis received a Bachelor of Arts degree in chemistry from Amherst College in Massachusetts, and his medical degree from the University of Illinois at Chicago College of Medicine. Dr. Francis earned a Master of Public Health degree from the University of Illinois at Chicago School of Public Health. He completed his medical training in primary care internal medicine at John H. Stroger, Jr. Hospital of Cook County.

Dr. Francis is a member of the Greater Humboldt Park Community of Wellness Steering Committee and the University of Illinois Chicago School of Public Health Executive Advisory Board. He also is a board member of Otho S.A. Sprague Memorial Institute; Physicians for Social Responsibility Chicago Chapter; and Bulletin of Atomic Scientists. Dr. Francis is a Fellow of the Leadership Greater Chicago Class of 2000.

APPLICATION FOR POST APPROVAL OF
CONTINUING EDUCATION COURSE OR PROGRAM

RECEIVED

AUG 28 2013

IOWA DENTAL BOARD

IOWA DENTAL BOARD
400 S.W. 8th Street, Suite D
Des Moines, IA 50309-4687
Phone (515) 281-5157
www.dentalboard.iowa.gov

NOTE: A fee of \$10 per course is required to process your request. PLEASE TYPE OR PRINT.

1. Course Title: Oral Surgery Office Emergencies

2. Course Subject:

- Related to clinical practice
- Patient record keeping
- Risk Management
- Communication
- OSHA regulations/Infection Control
- Other: _____

3. Course date: 8-14-13 Hours of instruction: 2

4. Provide a detailed breakdown of contact hours for the course or program:

1 hour lecture on cardiovascular, respiratory, + other emergencies
1+ hour of crash cart review and demonstration
of emergency procedures - intubation, CPR, etc with practice
emergency situations - laryngospasm, heart attack, syncope, etc

5. Name of course sponsor: Spring Park Oral & Maxillofacial Surgeons, PC

Address: 5345 Spring Street, Davenport, IA 52807

6. Which of the following educational methods were used in the program? Please check all applicable.

- Lectures
- Home study (e.g. self assessment, reading, educational TV)
- Participation
- Discussion
- Demonstration

7. Provide the name(s) and briefly state the qualifications of the speaker(s): _____

Karen K. Potaczek, DDS - Private practice since
2010 ; board certified in Oral & maxillofacial
Surgery.

8. Please attach a program brochure, course description, or other explanatory material.

9. Name of person completing application: Glenna Kohlmeyer

Title: front office supervisor Phone Number: 563) 359-1601

Fax Number: 563) 355-7111 E-mail: sposgk@hotmail.com

Address: 5345 Spring St., Davenport, IA 52807

Signature: Glenna Kohlmeyer Date: 8.14.13

Board rules specify that the following subjects are NOT acceptable for continuing education credit: personal development, business aspects of practice, personnel management, government regulations, insurance, collective bargaining, and community service presentations.

If the course was offered by a Board approved sponsor, you should contact the sponsor directly for approval information, rather than submitting this form. A list of approved sponsors and contact information is available on the Board website at www.dentalboard.iowa.gov. Continuing education guidelines and rules are also available on the Board's website. A course is generally acceptable and does not need to go through this formal approval process if it is directly related to clinical practice/oral health care.

You will be contacted after the Continuing Education Advisory Committee has reviewed your request. Please allow a minimum of two to three weeks for a response.

MAIL COMPLETED APPLICATION ALONG WITH THE REQUIRED **\$10 FEE** PER COURSE TO:

**Iowa Dental Board
Advisory Committee on Continuing Education
400 S.W. 8th Street, Suite D
Des Moines, Iowa 50309-4687**

Spring Park Oral & Maxillofacial Surgeons, P.C.
5345 Spring Street
Davenport, IA 52807

Presents:

“Oral Surgery Office Emergencies”

August 14, 2013
1:00 P.M.-3:00 P.M.

Presentation by Karen K. Potaczek, D.D.S.

includes:

- ❖ Lecture on cardiovascular, respiratory and other emergencies
- ❖ Review and demonstration of emergency procedures, including:
 - ❖ Review of the crash cart
 - ❖ Demonstration of emergency procedures
 - Intubation
 - CPR
 - ❖ Practice of emergency situations
 - Laryngospasms
 - Heart Attack
 - Syncope
 - Etc.

Two continuing education units will be awarded to all participants

**APPLICATION FOR PRIOR APPROVAL OF
CONTINUING EDUCATION COURSE OR PROGRAM**

A course is generally acceptable and does not need to go through this formal approval process if it is directly related to clinical practice/oral health care.

Pursuant to Iowa Administrative Code 650—25.3(5), please submit the application for approval 90 days in advance of the commencement of the activity. The Board shall issue a final decision as to whether the activity is approved for credit and the number of hours allowed. The Board may be unable to issue a final decision in less than 90 days. Please keep this in mind as you submit courses for prior approval.

MAIL COMPLETED APPLICATION ALONG WITH THE REQUIRED **\$10 FEE PER COURSE** TO:

**Iowa Dental Board
Continuing Education Advisory Committee
400 S.W. 8th Street, Suite D
Des Moines, Iowa 50309-4687**

**“Periodontics”
Dr. Sam Low**

**Lecture
March 21, 2014
(8 hrs. CE)**

The dental practitioner is continually challenged in periodontal care with customizing treatment for the restorative patient. Complicating the decision process is the influence of patient esthetic expectations and economic considerations. Unravel the complexities by

- Determining patient resistance/susceptibility patterns for predictable outcomes.
- Providing a “systems” approach to assessing prognosis for restorative abutments and when to extract with resulting implant therapy
- Enhancing esthetic results by manipulating gingivae.
- The role of laser therapy in periodontics including crown lengthening
- Creating true success by positive case acceptance and establishing long-term maintenance goals.
- Developing quality relationships with periodontists

**Hands on Training
Saturday and Sunday
March 22 & 23, 2014
(16 hrs. CE)**

By creating “hands-on” decision making situations, participants will have the opportunity to engage in actual patient cases.

Participation workshops will include the following:

- Utilize data collection to find and market periodontal care
- Introduce micro thin ultrasonic instrumentation for periodontal patients with emphasis of patient comfort and acceptance
- Collect data to determine case selection and choose appropriate surgical techniques
- Describe surgical techniques for restorative access including flap manipulation and suturing methodologies
- Review indications for mucogingival augmentation including attached gingivae and ridge anatomy
- Understand indications for using laser in crown lengthening and pre orthodontic procedures including esthetics

Dr. Samuel B. Low has over 30 years of private practice experience in periodontics and implant placement. He received his Certificate in Periodontology, and is Professor Emeritus at the University of Florida, College of Dentistry. He is Associate faculty member of the Pankey Institute and AGD member. He is also a Diplomate of the American Board of Periodontology and Past President of the AAP. Dr. Low provides dentists and dental hygienists with the tools for successfully managing the periodontal patient in general and periodontal practices. His research interests include ultrasonics, osseous grafting, and electronic data collection systems and is affiliated with the Florida Probe Corporation. He was selected "Dentist of the Year" by the Florida Dental Association, Distinguished Alumnus by the University of Texas Dental School and the recipient of the Gordon Christensen Lecturer Recognition Award. He is Past President of the Florida Dental Association.

Designation: Visiting Faculty
This dentist has participated in **500+** Pankey Credit Hours.

Biographical Information:

In active practice for more than 40 years, Dr. Blumenthal has always sought out new knowledge that would help him better serve his patients. That quest has led him to study medicine, occlusion, chiropractic medicine, kinesiology, restorative dentistry, biofeedback, neurophysiology, muscle physiology, nutrition, sleep disorders the list goes on and on with subjects in and outside of dentistry. He has applied this multi-disciplinary education to the diagnosis and treatment of TMD patients for more than 35 years. He has partnered with a wide range of professionals and developed a unique perspective of the interrelationship of TMD treatment as a multidisciplinary therapy involving many professionals who work in concert to best treat these very special patients.

He has directly and positively impacted the lives of countless patients with his ability to listen, observe, and understand. That number has been exponentially increased by his sharing of what he has learned over the years with other dentists as a teacher, mentor, and advisor.

The quest to be the best he could be led him to the Pankey Institute 34 years ago and started a relationship that continues today. He began to give back as a member of the visiting faculty 23 years ago and is one of the Lead Faculty for the Bite Splint and Temporomandibular Evaluation course.

Postural Restoration Certified (PRC)

Kathy Johnson, PT, PRC

Johnson Physical Therapy
1727 W Main St.
Albert Lea, Minnesota 56007
www.johnsonphysicaltherapy.com
Phone: 507-473-2200

Kathy graduated with a degree in Physical Therapy from the University of North Dakota in 1981. Throughout her career, she has been involved in many aspects of PT, including rehabilitation following stroke and head injury, treatment of movement disorders as a result of MS and Parkinson's, and evaluation and treatment of orthopedic conditions. Her work in Postural Restoration led to the accomplishment of Certification in 2009. Currently Kathy specializes in treatment of chronic pain conditions as a result of injury and disease. She works in a multi-disciplinary team approach with local dentists who specialize in splint treatment for TMJ and facial pain to provide relief of jaw, head, neck and shoulder pain.

TOPICS COVERED BY DR. BLUMENTHAL

- 1) Review of medical and dental history and discussion of how medications and nutrition affect joint health. Also discussed supplements that can improve joint health.
- 2) Discussed relationship of past trauma and joint health.
- 3) Reviewed patient symptoms sheet (attached). Discussed the significance of each symptom and how each relates to joint and muscle function and dysfunction. Demonstrated the use of symptom sheet in 2 clinical exams.
- 4) Discussed relationship of sleep, sleep disorders and TMD.
- 5) Reviewed head and neck muscle and joint anatomy.
- 6) Reviewed muscle and joint palpation. Demonstrated all muscle palpations in 2 clinical exams and had a break out session of muscle palpation with entire group of participants. (See attached sheet)
- 7) Lecture and demonstration during 2 clinical exams regarding Dr. Blumenthal's Pain Guide (see attached guide). Discussed relationship of each muscle to patient's occlusion and function. Demonstrated during 2 clinical exams.
- 8) Discussed having the patient circle areas of pain on a body drawing and the relationship of head and neck pain to pain in other areas of the body. Discussed this during 2 clinical exams.
- 9) Lecture on treatment options for TMD.
- 10) Lecture on splint therapy.
- 11) Discussion of splint therapy in conjunction with physical therapy.
- 12) Discussion and demonstration of team treatment of TMD.
- 13) Lecture and discussion of imaging and TMD.
- 14) Discussion of equilibration and restoration for TMD patients.

Interdisciplinary Treatment of the TMD Patient

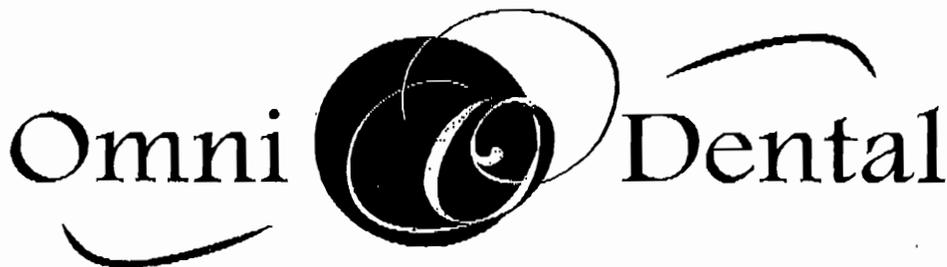

Course Objectives

Physical Therapy attendees will meet the following course objectives upon completion:

- Recognize how postural imbalances may affect occlusion.
- Recognize, in turn, how dental treatment of OMD (occlusal muscle dysfunction) may affect posture.
- Identify when a patient may benefit from a dental consultation to assist in accomplishing PT goals.
- Know how to best facilitate co-treatments with a dentist.
- Recognize that the visual/vestibular system may need to be addressed in treatment of the complex pain patient.

Syllabus

- Introduction
- Discussion of balancing "The Three S's" – how the diaphragm influences body positioning above and below
- Supporting the arches
- Practice diaphragmatic breathing exercise
- Recognizing postural asymmetries
- The inter-relationship of the visual/stomatognathic system
- Who to include in your circle of professionals
- Questions

Referring TMD patients to Physical Therapy ~ When, Why, and How

When a patient presents to our office with a complaint of TMD our exam and diagnosis process begins as soon as the patient enters the office.

As they walk into the room I observe them to see how they move and document the following:

- Check to see if the gait is smooth.
- Are the shoulder heights symmetrical?
- Is their head tilted to one side?
- Do they have a forward head posture?

Before the patients are seen in our office they get a welcome packet that includes a self assessment / symptom form and a series of drawings of the head and neck and full body for them to locate and document any areas of concern or pain that they have. The patient will also use their hands to rub the affected muscles as they explain their painful areas. As I look at these forms they help direct my questions to the patient as to their particular set of symptoms, their duration, intensity and the chronology.

If they indicate whiplash injury or I note some significant asymmetry or if they have significant neck and or back pain that predates the TMD pain a PT referral is then appropriate.

We now start with the physical exam process by doing an exam of the TMJ joint and check the centric relation, and any slide from CR to MIP and all excursive movements. The range of motion of the jaw in protrusion and lateral excursive is also recorded at this time. We also observe and record if the jaw deviates when opening and closing. We look closely at the guidance or the lack of it and the "smoothness" of the guidance.

We check for head rotation such as; how far they can rotate right and left and if there is any pain and/or restriction in the neck or shoulder area.

From here the muscle exam is completed, after first explaining to the patient what we are checking and how much force will be applied. If there are any *very* tender muscles noted I like to have the patient palpate them to see how little pressure is required to cause pain and where to apply that pressure.

After all the muscles are examined an anterior deprogrammer is carefully placed with fast set bite registration material, being sure the occlusal plane of the deprogrammer is parallel to the patients own occlusal plane. Once it is set, I have the patient open, then protrude jaw, then tap on the deprogrammer. Next I have them open with extreme lateral excursive and tap, then the same in the opposite direction. The patient continues to tap and slide as far as possible for several minutes.

After the patient has a couple of minutes wearing the deprogrammer we check the excursive movements. We want to see if they are smooth and if the range of motion has increased and record any change that is noted.

Next we check the head rotation and record the changes and if there is any residual tenderness in the neck or shoulder area.

We then look at the muscle exam to see which muscles were sore and which ones you had the patient palpate. The previously tender muscles are re-examined and the patient is allowed to palpate the areas also. Hopefully there has been significant improvement of the muscle tenderness. If there is significant improvement the patient now has confidence you can help them with a splint and there is a relationship between how the teeth fit together and how the TMJ and muscles feel.

If there is improvement, but still residual muscle pain we still recommend splint therapy. However, we inform the patient they may need to be referred to other healthcare professionals, such as a Physical Therapist to resolve other issues before our treatment is complete.

After the patient has the splint inserted and it is adjusted precisely if they are better but not great I will then work with a postural restoration Physical Therapist. The patient will see the Physical Therapist with the deprogrammer in their mouth and come DIRECTLY to our office so the splint can be adjusted when the patient's body is in a balanced or "neutral" position. The last little bit of adjustment can make all the difference from having a patient that is better verses one that is good.

The last few years have been very interesting as I learn to refer to and work with Physical Therapy. It has certainly helped my patients on their journey to wellness.

Indications for Physical Therapy Referral for Dental Consultation

As a Physical Therapist certified in Postural Restoration®, I understand the importance of working closely with a dentist when evaluating and treating my patients' head, neck, shoulder, and upper torso pain. You, as dentists, may receive referrals from Physical Therapists, and hopefully will appreciate that Physical Therapy treatment may be a critical adjunct therapy for many of your TMD patients. Considering when to refer to PT is covered nicely by the short article in your packets written by Paul Stadem, DDS. I will cover when a PT should consider referral to a dentist not only for your information, but hopefully to pass along to your referral sources as an educational tool.

There are several things that your patient may do or say during the intake assessment that will begin to cue the therapist that there may be a dental component to their pain. For example, when the patient typically describes their headache as anywhere except posterior head/neck, and the hands tend to sweep from the temples(s) to the supraorbital area, along the sides of the face (masseters), or when they point to the vertex of the skull. These areas typically correspond to referred pain patterns from muscles with trigger points. A red flag goes up if the patient connects the onset of his or her headaches or facial pain with a dental procedure such as an extraction, root canal, or crown. A referral is definitely indicated if they complain of clicking, locking, or pain directly in the TMJ. Also, I have found that most people with the following will benefit from a dental consultation: sleep apnea not otherwise controlled i.e. no appliance or CPAP, grinding at night (most often noticed by spouse), clenching during the day (may be helpful to have them make a diary with frequency/intensity), or pain in the "jaw" when awakening in the mornings.

Observing the patient's posture and body symmetry may tick a few boxes in favor of a dental referral. I recommend taking two pictures of the patient; full length, and face only. The most important indication in the full length view is a prominent head tilt. In the facial view, look for indications of asymmetry of the maxilla and/or mandible. Maxillary cants are easily identified by placing a tongue depressor horizontally between the incisors. "Crooked" faces can sometimes be tricky, and are best observed when flipping the facial picture of the patient upside down, or observing the patient supine while standing at their head and looking towards the toes. A typical finding is a deviation of the mandible, frequently to the left. Hypertrophied masseters on one or both sides are a concern that should be looked into.

An intra-oral assessment is crucial. Abnormal findings of concern are: missing teeth, particularly molars, scalloped tongue borders, cross bites, class III bites, and open bites either anterior or posterior. The presence of worn incisors is a clue that the patient grinds his or her teeth, and would most likely benefit from an appliance for protection of the teeth and inhibition of abnormal muscular activity that is likely inhibited by higher cortical control during the day-time hours. In my experience, it is unlikely that PT treatments alone will accomplish optimal pain relief in the presence of only anterior tooth contact i.e. missing back teeth. It is difficult, if not impossible, to completely inhibit over-active anterior neck muscles in these cases.

There is one main evaluation finding that points strongly in the direction of a dental consultation for consideration of appliance therapy. This is when neutrality can be accomplished and maintained when keeping the patient out of his or her habitual occlusion. In the PT clinic, this can be assessed easily by having the patient gently hold a tongue depressor horizontally between their incisors for several minutes both during rest and during activity. There should be no contact of any tooth to any other tooth. The patient and therapist should notice improved cervical rotations left/right, improved shoulder mobility (pre-post Apley's scratch test), improved trunk mobility (pre-post standing forward bend/toe touch), and reduced pain and muscle tension subjectively. If the patient improves with each PT session, but is unable to maintain between sessions, this leads me to the conclusion that a dental appliance may help us not only get from point A to point B, but to stay there.

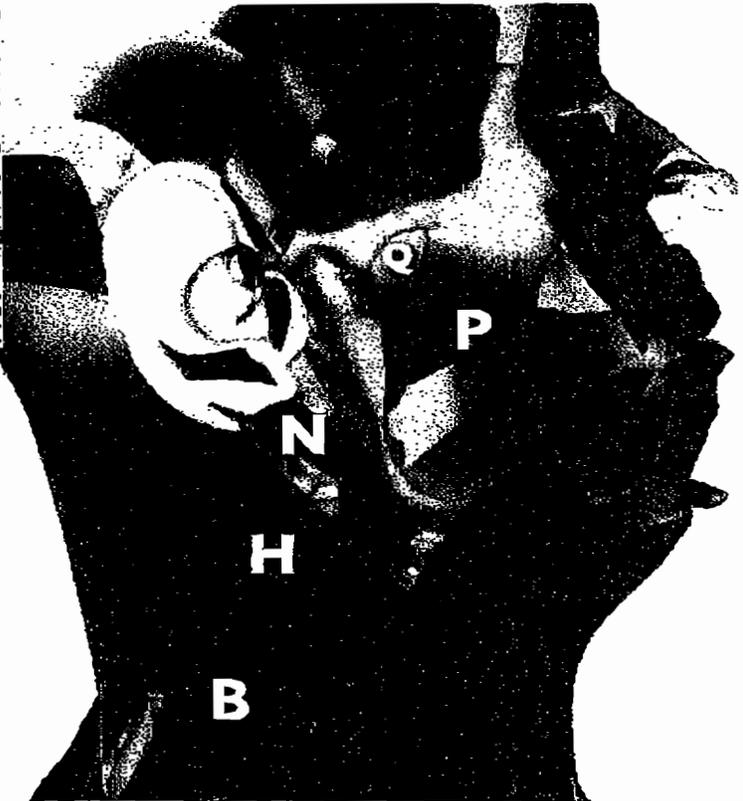

There is no amount of experience alone that can trump an open line of communication between the Dentist and Physical Therapist. Developing a language common to both disciplines is helpful. For example, an Apley's scratch test and cervical rotations are objective findings that can easily be reproduced in either setting. Pictures or video can substitute for exact goniometric measurements, and can be digitally shared between the professions.

I am convinced that interdisciplinary treatment is essential to accomplish optimal outcomes for our complex upper quarter pain patients. My objective is that these tips will help facilitate a dialogue between the dentist and other professionals, particularly Physical Therapy.

What's New and Updated for 2013!

Ethics, Laws & Rules for the Healthcare Professional² \$30

Ethical considerations facing the healthcare profession in the new millennium. Case studies designed to help you make the right decisions. Review philosophy about ethics. Compare legal and ethical issues. (Marcil, RDH, MS) (TB) (GO)

2
CREDITS

HIV/AIDS Update² \$30

Condensed review of the HIV virus in relation to the dental professional. Up-to-date statistics and information on transmissibility. Identify current procedures for post exposure to blood products from HIV/AIDS patients. (Bruinius, RDH, Med) (TB) (GO) (Meets FL & KY Req.)

Intro to Lasers in Dentistry² \$30

Discusses the basic components, types and properties of lasers used in dentistry. Learn clinical applications of lasers and identify safety precautions when working with lasers. Study pros and cons of using lasers in dentistry. (Bell, DDS, Paquette, LPN, BS) (TB) (GO)

Obesity and Dental Disease² \$30

Identify risk factors, trends and common medical conditions associated with obesity. Discover the relationship between obesity and dental caries and periodontal disease. Learn what preventative measures are available to the obese patient to help manage their overall oral and systemic health. (Paquette, LPN, BS, Plum, RN, BSN) (TB) (GO)

Prevention of Medical Errors² \$30

Identify important considerations regarding legal issues, preventing lawsuits, risk management planning, and accident prevention. Learn to decrease professional risks by establishing guidelines to reduce medical errors. Be able to give current advice for reducing legal incidences because of malpractice issues. (Meets FL & SC Req.) (Bruinius, RDH, Med) (TB) (GO)

Sedation in Dentistry² \$30

Distinguish how sedation can aid in patient pain and anxiety management. Examine the guidelines for intra operative monitoring of patients undergoing Conscious or Deep sedation and General Anesthesia. Recognize practical considerations that can reduce potential sedation complications. (Meets FL req.) (Bell, DDS, Marks, RDH, MS) (TB) (GO)

Tooth Whitening:² Frequently Asked Questions \$30

Discover advantages and disadvantages for making America's teeth white. Review stain and discoloration properties. Examine the various products and treatment options available for your patients. (Marcil, RDH, MS) (TB) (GO)

2-3
CREDITS

Getting to the Root of Bad Breath³ \$40

Learn how certain foods and poor habits can lead to bad breath. Distinguish which dental and medical conditions are associated with this embarrassing condition. Identify the cause and assist patients with a specific remedy to reduce or prevent bad breath. (Paquette, LPN, BS) (TB) (GO)

Heart Conditions and Related Prophylactic Treatment³ \$40

Know the protocols for administering antibiotic prophylaxis recommended for dental procedures. Learn what these conditions are, who is susceptible and how they are treated and diagnosed. (Plum, RN, BSN) (TB) (GO)

Medical Emergencies³ \$40

Discuss the basic preparation, essential drugs and equipment needed when using sedation techniques. Discover the nature and frequency of adverse drug and overdose reactions. Learn to recognize certain medical emergencies that may manifest during sedation and discuss medical management. (Bell, DDS, Plum, RN, BSN) (TB) (GO) (Meets FL & OR Req.)

Manage Dental Trauma in Practice⁶ \$70

The management of dental trauma will continue to be an integral element of the everyday clinical practice. Examine the various primary and permanent dentition injuries that occur and the current thinking in the management of different types of dental trauma. (Welbury, DDS, PhD, Gregg, DDS) (TB)

Infection Control for the Dental Team⁸ \$80

Increase your knowledge in relation to infection control risk, medical history analysis, proper personal protection, surgery design and equipment, instrument decontamination, disinfection, and ethical/legal responsibilities in infection control. (Meets CA Req.) (Martin, DDS, Fulford, DDS, Preston, DDS, PhD) (TB)

Spanish Terminology for the Dental Team⁸ \$80

Quick easy-to-use pocket-sized resource for the office. Be able to communicate more effectively and improve the quality of care to your Spanish speaking patients. Learn how to formulate instructions, explanations and answer dental treatment questions. (Nunez, DMD, MS) (Not approved in CA) (TB)

8-16
CREDITS

Orofacial Pain¹⁰ \$100

Identify guidelines for assessment and develop a differential diagnosis between TMJ disorders and other orofacial pain disorders of local or systemic origin. Discuss the possible indications, contraindications, limitations of diagnostic techniques and devices. (Leeuw, DDS, PhD, Baragona, DMD, Bertrand, DMD, MS, Black, MD, Carson, PhD) (TB)

Sedation-A Guide to Patient Management¹⁶ \$135

Learn essential theory with "how-to" technical instruction. This comprehensive guide is the leading reference for basic techniques in sedation and anxiety control for all types of dental offices. The latest guidelines from the ADA and the ASA keep you up-to-date with the latest medical standards. (Malamed, DDS) (TB)

Oral and Maxillofacial Medicine¹⁶ \$135

Gain an understanding of common presenting complaints and relevant follow up questions. Recognize common and potentially serious disorders that are routinely encountered in clinical practice. Discover how treatment may impact dental management. Contains many diagnostic algorithms to aid diagnosis. (Scully, MD, PhD) (TB)

Temporomandibular Joint Functions & Malfunction ⁵ \$60

Provides a functional understanding of temporomandibular joint anatomy in both the healthy and injured conditions. Various treatment philosophies will be presented as well as diagnostic testing, imaging, and treatment modalities.

(Andrews, DDS, LMT) (TB) (GO)

5-8 CREDITS

Alternative Therapies in Medicine and their Dental Implications ⁶ \$70

Determine how acupuncture, aromatherapy and herbal supplements are being used for pain and stress management in healthcare practices. Review current trends involving such as acupuncture, aromatherapy, and herbal supplementities.

(Karpis, RDH, EdD) (TB) (GO)

Dental Drug Reference ⁸ \$85

Quick and concise handbook with up-to-date information to assist in patient evaluation and treatment. Identify the most frequently prescribed medications. Herbal remedies are included for the first time! Free CD with printable patient educational sheets.

(Gage, RPh, DDS, PhD & Pickett, RDH, MS) (TB)

Complete Dentures from Planning to Problem Solving ⁸ ~~\$85~~ 90

Learn proper assessment, impression procedures and jaw relationship involved in the manufacture of complete dentures. Discuss the development of occlusal schemes, trial dentures through delivery. Recognize problems that may arise with new complete dentures.

(Allen, McCarthy) (TB)

Handbook of Nitrous Oxide and Oxygen Sedation ⁸ \$85

Excellent chairside reference for the healthcare professional. Comprehensive information on the principles of nitrous oxide sedation for the management of pain and anxiety.

(Clark, DDS, FACD & Brunick, RDH, MS) (TB)

Aesthetic Dentistry ¹⁰ \$100

Identify key points, critical techniques and common pitfalls of aesthetic dentistry.

Learn how to solve common aesthetic dilemmas while minimizing compromises. Illustrations used to highlight fundamental principles to improve your dental practice.

(Bartlett, PhD & Brunton, DDS) (TB)

Applied Pharmacology for the Dental Hygienist ¹⁰ \$120

Up-to-date reference text covers the most pertinent information about drugs, their interactions, and drugs used in dentistry that may alter dental treatment in an easy-to-read format.

(Requa-Clark, PharmD) (TB)

10 CREDITS

Interpret Dental Radiographs ¹⁰ \$100

Discover the art of reading x-ray images. Gain anatomical knowledge and identify appearances that challenge most dentists. Over 100 images used to promote proper identification of anomalies, caries, trauma,

and periodontal condition.

(Horner, Rout, & Rushton) (TB)

Implantology in the General Dental Practice ¹⁰ \$100

Improve your patient assessment skills, treatment planning, and implant selection criteria. Identify surgical and treatment protocols for achieving optimum functional and cosmetic results. Contains color illustrations.

(Searson, Gough, & Hemmings) (TB)

Oral Pathology for the RDH ¹⁰ \$120

Full color atlas illustrating common oral lesions. Learn to accurately identify and describe abnormal findings. Up-to-date information on TMJ and implants.

Excellent reference book for any practice!

(Ibsen, RDH, MS & Phelan, DDS) (TB)

Periodontology for the Dental Hygienist ¹⁰ \$120

Gain knowledge in the discipline of dental hygiene as it relates to periodontology. The latest in clinical assessment, plaque control, nonsurgical & surgical therapy, dental implants and periodontal maintenance.

(Perry, RDH, PhD, Beemsterboer, EdD, Taggart, DDS, MS) (TB)

Successful Posterior Composites ¹⁰ \$100

Review current concepts, evidence, and understanding the placement of posterior composites. Discusses materials and present techniques for successful posterior restorations. Identify common pitfalls when restoring posterior teeth.

(Lynch, DDS) (TB)

Treatment of Periodontal Disease ¹⁰ \$120

Learn current rationale for the treatment of periodontal disease. Increase your knowledge of laser therapy, growth factors, drug delivery systems and implants to restore lost tissues and function. Identify future approaches such as gene therapy, RNA interference and stemcells.

(Scannapieco, DMD) (TB)

10-16 CREDITS

Endodontics in Clinical Practice ¹² \$130

Provides comprehensive discussions in the growing specialty of endodontics, the prevention and treatment of apical periodontitis. Covers general and systemic aspects of endodontics, pulp space anatomy, surgical endodontics, periodontal disease and more.

(Ford, PhD) (TB)

Medical Emergencies in the Dental Office ¹⁴ \$130

An essential reference for managing medical emergencies in the dental office with an emphasis on prevention and common types of specific emergencies. Algorithms provide step-by-step instructions.

(Malamed, DDS) (TB) (TBO)

Dental Management of the Medically Compromised Patient ¹⁶ \$135

Information on the management of patients with special needs. Currently accepted therapies for conditions such as diabetes, AIDS, heart, pulmonary, and liver disease. Discusses management of oral lesions.

(Little, Falace, Miller, & Rhodus, DMD) (TB) (TBO)
